

SEV and SE1 ranges 1.1 – 11 kW

– now with analogue sensors

Grundfos SEV and SE1 ranges

Highly advanced pumps with many unique features

The Grundfos SEV and SE1 ranges are technologically very advanced pumps designed to handle wastewater, process water, and unscreened raw sewage in heavy-duty municipal, utility, and industrial applications.

For monitoring of pump conditions at any given time, pumps are available with analogue sensors.

These heavy-duty pumps are built for years of trouble-free operation in the most demanding applications. The pumps may be installed submerged or dry without motor cooling; in either case they are extremely reliable and very easy to service.

The efficient single-channel or SuperVortex impellers provide free passage of solids up to 100 mm. This greatly reduces the risk of clogging and ensures maximum up-time and reduced operating costs.

➤ Unique liquid-less motor cooling

A solid-block stator housing transfers excess heat to the pumped liquid in the pump housing. This allows for continuous operation in partly submerged or dry installations. No cooling liquid is needed.

➤ Unique cable entry

A polyurethane-filled stainless steel cable connection provides a hermetically sealed cable entry. This totally eliminates the risk of water entering the motor through the cable.

➤ Unique cartridge shaft seal

Primary and secondary mechanical shaft seals are fitted in a single, easy-to-replace compact cartridge unit.

➤ Unique modular design

The SEV and SE1 ranges are designed for maximum flexibility. The detachable motor units are interchangeable and fit both channel impeller and SuperVortex pumps.

➤ Analogue sensors – constant monitoring of pump conditions

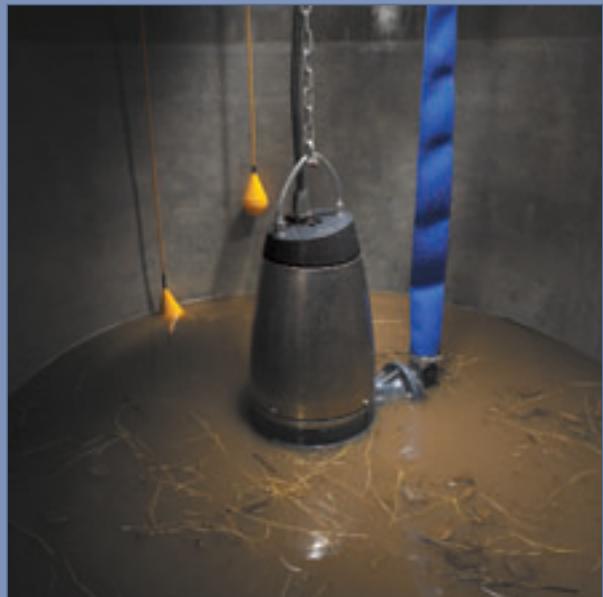

The analogue sensors in the SEV and SE1 pumps constantly monitor pump conditions and give excellent opportunities to carry out preventive maintenance thus eliminating unscheduled downtime. Type of sensors are shown on page 5.

Installation

The Grundfos range of heavy-duty sewage pumps, SEV and SE1, can be permanently installed by means of an auto-coupling guide-rail system or with a fixed pipe connection, submerged or dry without separate motor cooling arrangements. The pumps are also suitable for free-standing installation, or as portable utility pumps.

Submerged installation on auto-coupling with guide rails
When installed on an auto-coupling system, the pump automatically connects to a base unit fixed to the bottom of the pump pit.

Submerged free-standing installation, or portable use
Fitted with an optional ring stand, the pumps may be installed free standing in a pump pit, or they can be used as portable utility pumps in non-permanent installations.

Vertical dry installation
Due to the efficient liquid-less motor-cooling system, the SEV and SE1 pumps are suitable for dry installation – either vertically or horizontally – to suit specific application arrangements.

Horizontal dry installation
Horizontal dry installation improves the overall efficiency of the system as unnecessary components and bends are avoided. Special mounting brackets are available for horizontal installation.

Tough and reliable pumps...

Advanced technology inside out

The Grundfos SEV and SE1 pumps feature advanced technology inside out. In spite of their good looks, these highly efficient pumps are designed for years of trouble-free operation in the toughest environments. Easy to install and easy to service, the SEV and SE1 pumps ensure low long-term operation costs.

Watertight cable connection

Polyurethane-filled stainless steel cable connection, hermetically sealed. Ensures that liquid cannot penetrate through the cable into the motor. Different cable lengths are available.

Short rotor shaft

Compact motor construction with short rotor shaft reduces vibrations. Increases efficiency and lifetime of shaft seal and ball bearings.

Liquid-less motor cooling

Solid-block stator housing with built-in cooling conduits, which efficiently transfer excess heat to pumped liquid via a solid cast iron cooling flange. This allows for continuous operation even in dry installations.

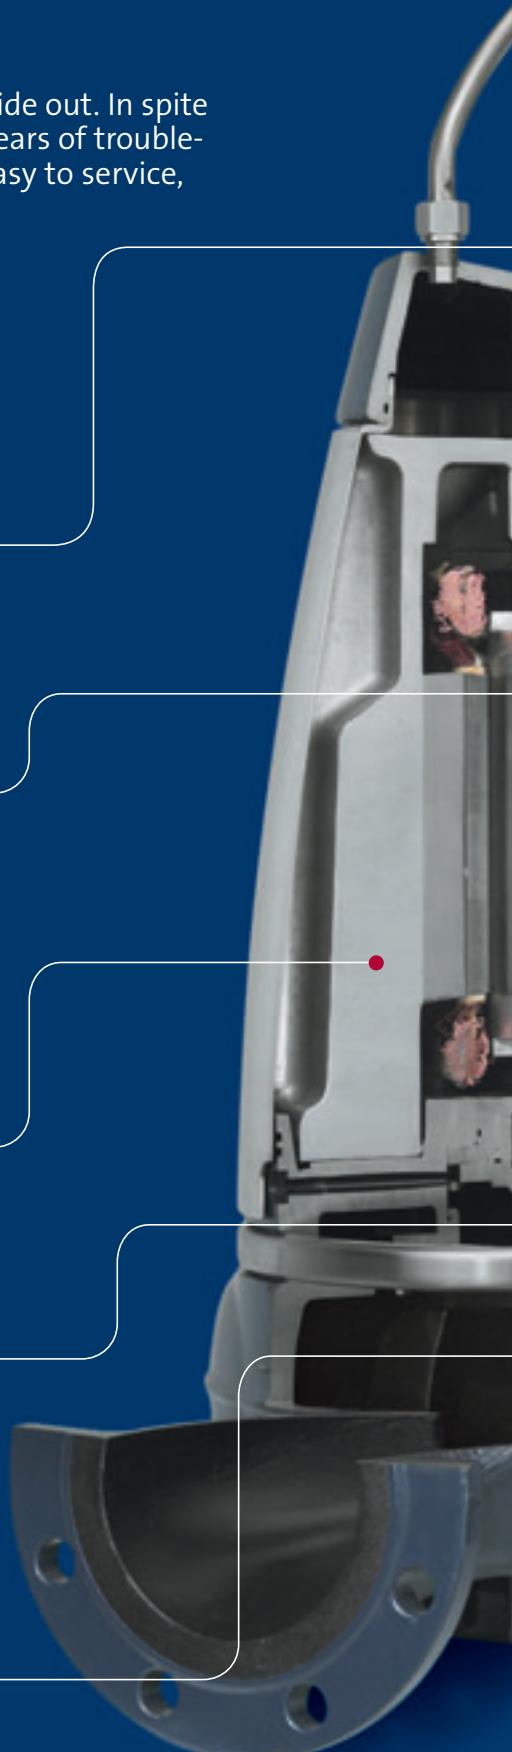

Double mechanical shaft seal

Efficient single-unit cartridge shaft seal system ensures longer operation time and less downtime. Easy to replace in the field without use of special tools.

Replaceable wear ring

Easy replaceable stainless steel wear ring on channel impeller and rubber seal ring in the pump housing enable maintaining maximum pumping efficiency without replacing impeller.

– with many unique features

Stainless-steel motor jacket

Extremely robust impact-resistant stainless steel motor-housing jacket.
Easy-to-clean smooth surface.

Heavy-duty ball bearings

Double row of angular-contact, maintenance-free lower ball bearings protect against axial and side forces. They ensure correct positioning of impeller in pump housing and provide longer lifetime.

Sensors – in sensor versions

Analogue water-in-oil sensor.
Analogue winding temperature sensor.
Analogue insulation resistance sensor.
Digital moisture sensor.
[Standard version with thermal sensor in motor winding.]

Stainless steel clamp

Unique clamp assembling system enables quick and easy disassembly of pump from motor unit. No tools required. Provides easy access for service and inspection.

Modular design

Each motor size fits several pump sizes with channel-impeller or SuperVortex hydraulics.

SmartSeal

The patented Grundfos SmartSeal, mounted on the guide claw, provides a leak-proof connection, which optimises the efficiency of the pump system and keeps running cost at a minimum.

Grundfos SuperVortex-impeller pumps

A unique impeller design

The design of the Grundfos SuperVortex impeller is truly unique. The special blade vanes ensure high pumping efficiency and excellent air evacuation while preventing clogging or jamming. Depending on pump model, the SuperVortex-impeller allows for free passage of solids of 65 mm, 80 mm, or 100 mm respectively.

The Grundfos SEV pump range with SuperVortex impeller is the ideal choice for applications where abrasive liquids, large quantities of solids, gassy sludge, or fibres are anticipated.

No clogging or jamming

In a pump fitted with a Grundfos SuperVortex impeller, the flow takes place entirely outside the impeller making these pumps ideal for handling heavy and gassy sludge. Long fibres, rags and other solids pass freely through the pump without getting caught by the impeller so that clogging or jamming are avoided. This means less down-time and, consequently, reduced service and maintenance.

No turbulent disturbance

In pumps fitted with conventional vortex impellers, turbulent disturbance is liable to form around the impeller. This will disrupt the flow pattern and result in reduced pumping efficiency and lower head.

With the Grundfos SuperVortex impeller, the liquid passes freely outside the impeller without generating any turbulent disturbance.

Grundfos channel-impeller pumps

Ideal for large flows

The Grundfos channel impellers provide high efficiency and excellent non-clogging capabilities. Depending on pump model, the channel impellers allow for free passage of solids of 50 mm, 80 mm, or 100 mm respectively.

Grundfos SE1 pumps with a 80 or 100 mm channel impeller are ideal for large flows of raw sewage.

Large free passage

The Grundfos channel impellers are of a semi-axial design with extra long vanes. This ensures maximum performance and eliminates problems with fibres getting caught in the impeller, liable to cause clogging. The Grundfos SE1 pumps are capable of handling solids up to 100 mm size.

Replaceable wear ring

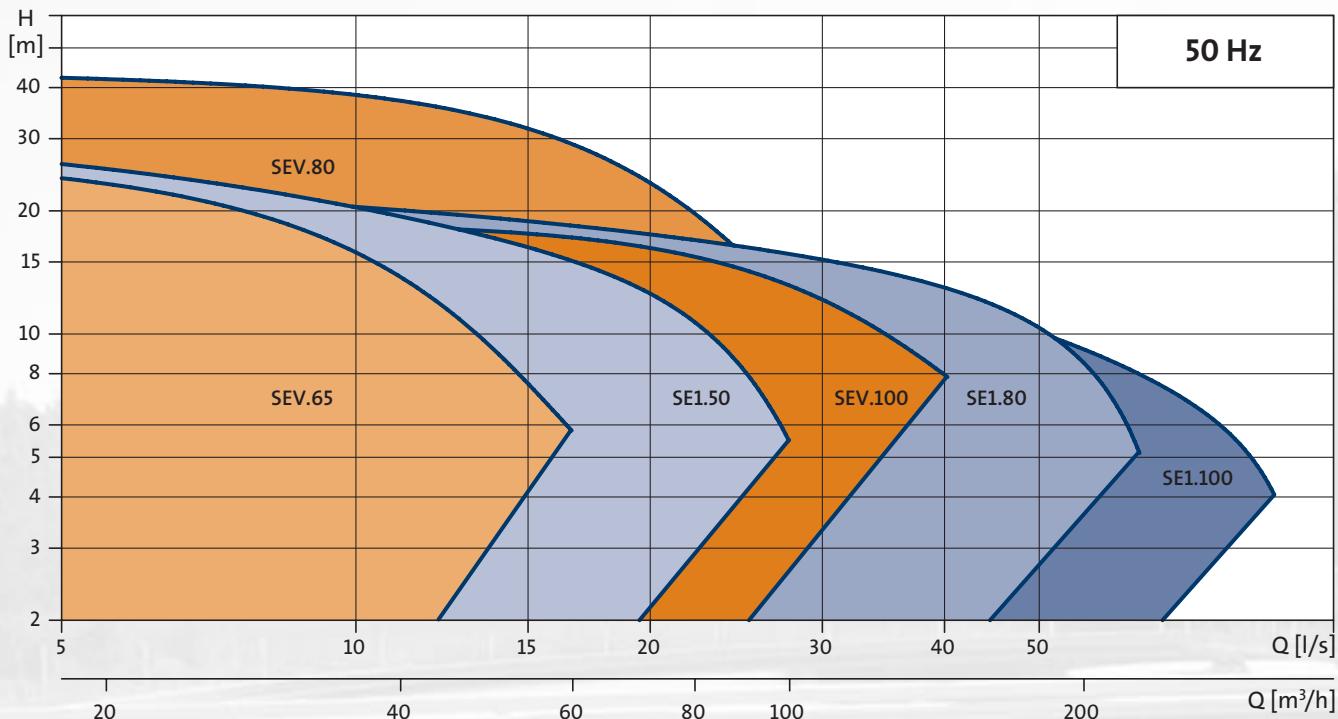

The design of the channel impeller with a replaceable steel wear ring and the corresponding rubber seal ring on the pump housing makes the pump more resistant to wear caused by abrasives in the pumped liquid.

The system enables maintaining maximum pumping efficiency for extended periods without replacing the impeller. The result is less clogging and less downtime.

Performance overview and type key

Performance overview – Grundfos SEV and SE1 pumps

Type key

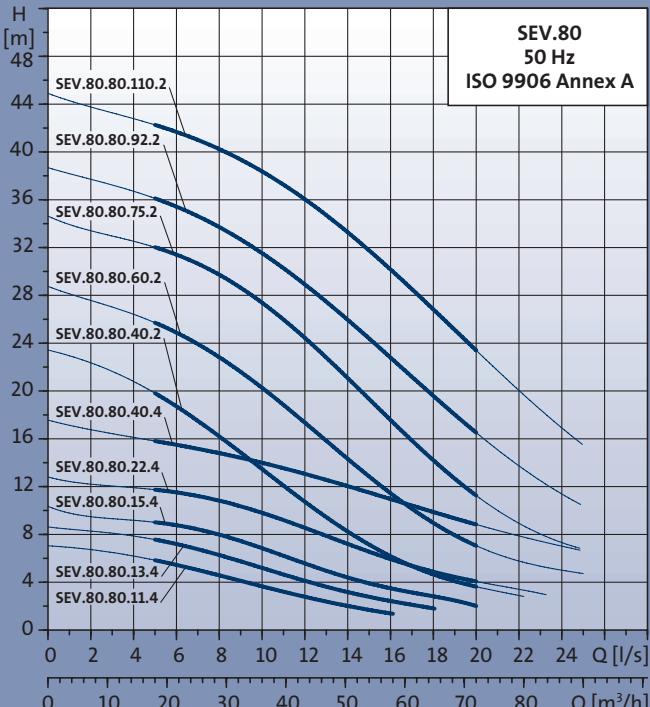

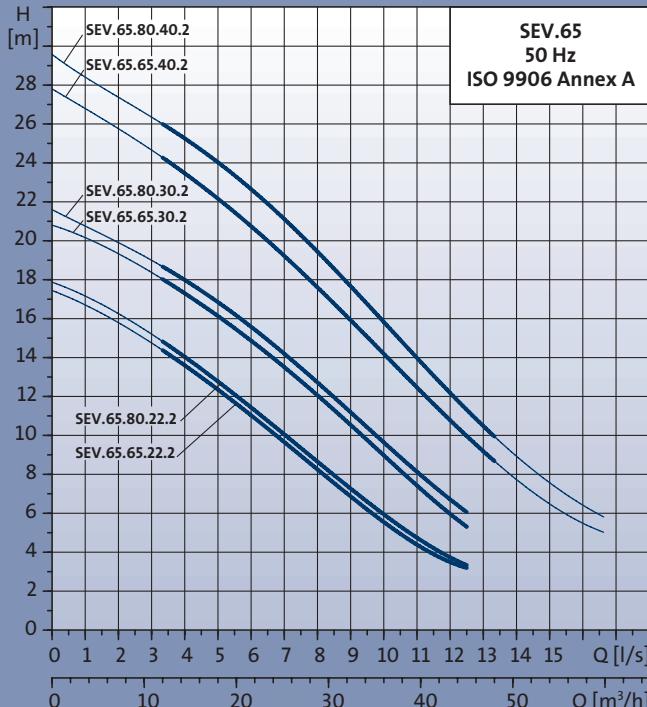

The Grundfos SEV and SE1 pumps can be identified by means of the type key below.

The pump type designation is printed on the nameplate, located on the top cover of the pump.

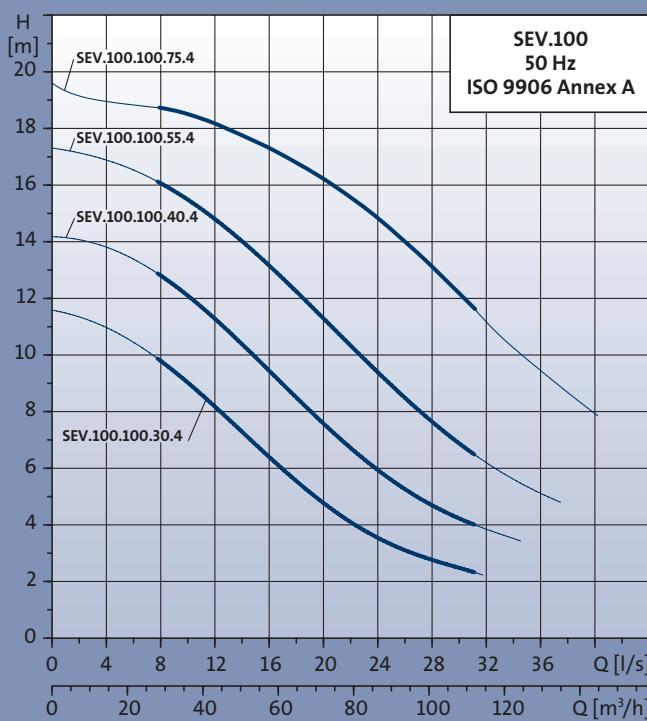

Code	Pump type	Example:	SE	1	.80	.80	.40	.A	.Ex	.4	.5	1D	
SE	Grundfos wastewater pump/sewage pump												
1	Impeller type												
V	Channel impeller, number of channels												
V	Free-flow impeller (SuperVortex)												
80	Pump passage												
80	Maximum solids size [mm]												
80	Pump discharge												
80	Nominal diameter of pump discharge port [mm]												
40	Power												
40	Motor output power P2/100 [W]												
[]	Equipment												
A	Standard

Grundfos SuperVortex-impeller range

Performance curves

The figures attached to each curve indicate pump type. Bold curve lines indicate recommended operation area. Please refer to tables on page 12 for pump designation and technical data.

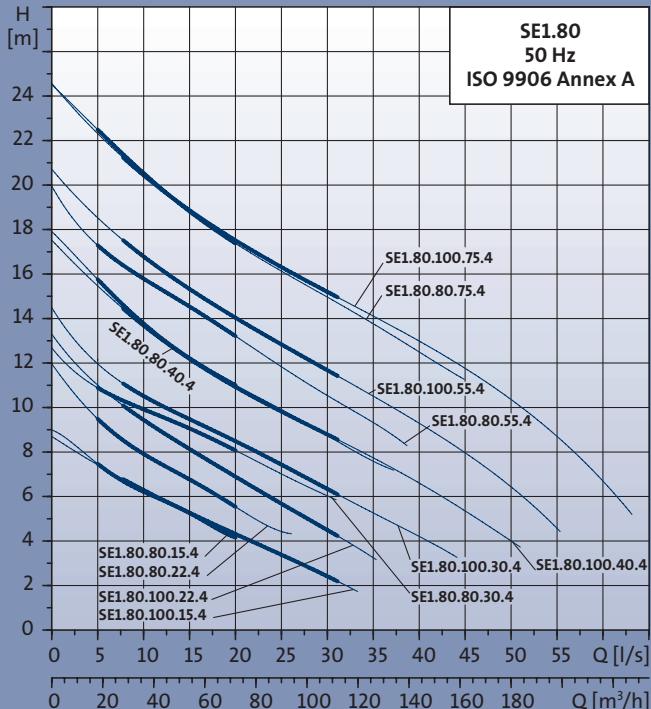

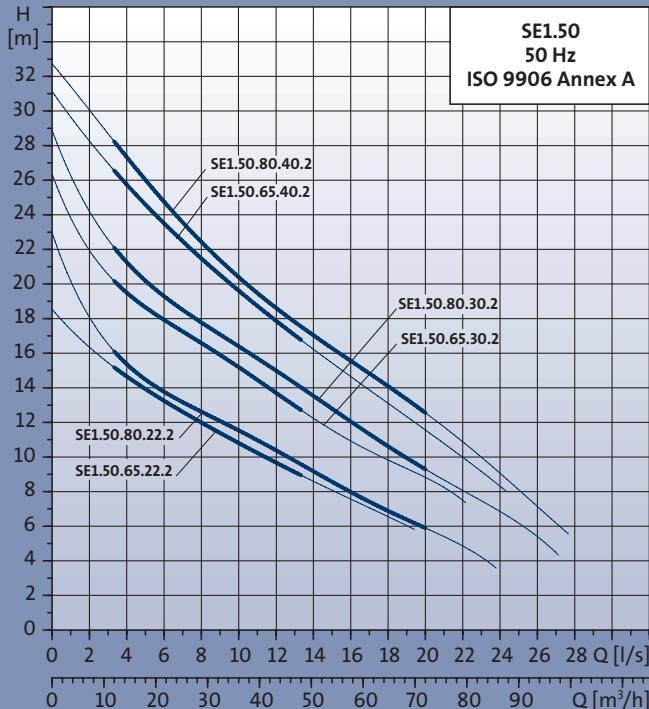

The Grundfos SuperVortex range comprises a large number of variants designed for pumping abrasive wastewater, process water, sludge, and unscreened raw sewage with a pH value of 4-10 and with a high content of fibres and solids up to 100 mm size.

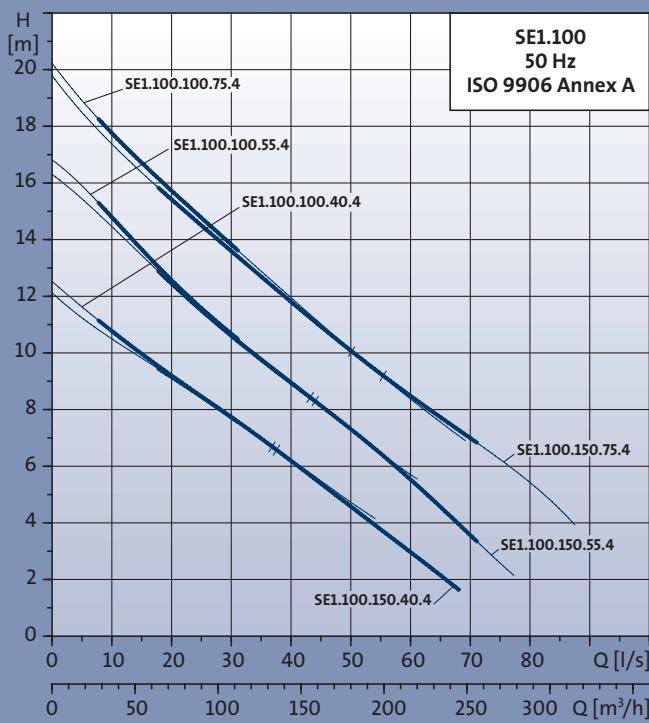

Grundfos single channel-impeller range

Performance curves

The figures attached to each curve indicate pump type. Bold curve lines indicate recommended operation area. Please refer to tables on page 14 for pump designation and technical data.

The Grundfos range of single channel-impeller pumps comprises a large number of variants designed for pumping large quantities of wastewater, process water, and unscreened raw sewage with a pH value of 4-10, containing solids up to 100 mm size.

Technical data

Material specifications

Description	Material	DIN W.-Nr. / EN Standard	AISI / ASTM
O-rings	NBR rubber		
Seal ring for inlet (SE1 pumps only)	NBR rubber (reinforcement stainless steel)	1.4301	304
Impeller	Cast iron	EN-JL1030/GG20	
Wear ring impeller	Stainless steel	1.4301	304
Pump housing	Cast iron	EN-JL1030/GG20

Cable	H07RN-F		
Lifting bracket	Stainless steel	1.4401	316
Oil	Shell Ondina 917		
Epoxy coating	Colour: NSC S 8005 R80B		

Operating conditions

The Grundfos SEV and SE1 pumps are suitable for continuous submerged operation with a liquid level just above the pump housing, or in a dry installation without separate motor cooling arrangements.

Maximum temperature of pumped liquid: 40°C.

For short periods, maximum one hour, up to 60°C is permissible (non-Ex versions only).

Ambient temperature limitations: 40°C

Maximum submersion: 20 m

Pump start frequency should not exceed 20 starts/stops per hour.

Approvals

All 50 Hz SEV and SE1 pumps have been approved, according to DIN EN 12050-1 for use in buildings services by the German Building Technology Institute.

Explosion-proof versions

For applications involving a risk of explosion, or where otherwise required, explosion-proof versions of the Grundfos SEV and SE1 pumps are available: II 2 GD, EEx dc IIB T4, T3, IP68, T 135°C, T 200°C explosion protection classification according to EN standards 50 014-1997 / 50 018-2000 / 50 281-1-1.

The SEV and SE1 pumps are also available with a Class 1 Zone 2, Ex nA IIB 200°C (T3) classification in accordance with the IEC 60079-15:1987.

Accessories

Overview of the accessories available for the Grundfos SEV and SE1 pumps

No.	Picture	Description	Dimensions	SEV 65 08'08135	SEV 80 08'08135	SEV 100 08'08135	SEV 125 08'08135	SEV 150 08'08135	SEV 175 08'08135	SEV 200 08'08135	Product number	
1		Complete auto-coupling system, including guide claw, baseplate and upper guide rail holder. Cast iron, epoxy coated. With bolts, nuts, gaskets and anchor bolts.	DN 65	•				•				96 09 09 92
			DN 80		•	•				•	•	96 09 09 93
			DN 80/DN 65	•				•				96 10 22 38
			DN 100				•	•			•	96 09 09 94
			DN 100/DN 80	•	•				•	•		96 10 22 40
			DN 150					•				96 09 09 95
			DN 150/DN 100			•	•				•	96 10 22 41
2		Ring stand with flanged 90° elbow and hose connection. Cast iron, epoxy coated. With bolts, nuts, gaskets and anchor bolts.	DN 65/DN 65/2½"	•								96 10 22 53
			DN 65/DN 80/3"		•							96 10 23 78
			DN 80/DN 65/2½"					•				96 10 24 39
			DN 80/DN 80/3"						•	•		96 10 22 54
			DN 100/DN 80/3"		•							96 10 23 13
			DN 100/DN 100/4"			•					•	96 10 22 55
			DN 150/DN 100/4", Galvanized steel				•					96 10 23 14
		Ring stand with flanged 90° elbow and outside thread connection. Cast iron, epoxy coated. With bolts, nuts, gaskets and anchor bolts.	DN 150/DN 150/6", Galvanized steel					•				96 10 22 56
			DN 65/DN 65/R 2½"	•								96 10 23 79
			DN 65/DN 80/R 3		•							96 10 23 80
			DN 80/DN 65/R 2½"				•					96 10 24 40
			DN 80/DN 80/R 3					•	•			96 10 23 81
			DN 100/DN 80/R 3		•							96 10 23 82
			DN 100/DN 100/R 4		•						•	96 10 23 83
3		Base stand for vertical dry installation, including 90° elbow. Galvanized steel. With bolts, gaskets and anchor bolts.	DN 150/DN 100/R 4, Galvanized steel			•						96 10 23 84
			DN 150/DN 150/R 6, Galvanized steel				•					96 10 23 85
			DN 65	•	•							96 10 22 57
			DN 80					•	•	•		96 10 22 58
			DN 100/DN 80					•	•	•		96 56 71 74
			DN 100		•	•					•	96 10 22 59
			DN 150/DN 100		•	•						96 56 71 75
4		Brackets for horizontal dry installation. With bolts, gaskets and anchor bolts. Galvanized steel.	DN 150			•	•					96 10 22 60
			DN 200/DN 150			•	•					96 56 71 76
			DN 65 for 2.2 – 3 kW, 2 pole	•	•							96 10 22 61
			DN 65 for 4 kW, 2 pole	•	•							96 10 22 62
			DN 80 for 2.2 – 3 kW, 2 pole					•	•			96 10 19 12
			DN 80 for 1.1 – 2.2 kW, 4 pole							•		96 10 19 12
			DN 80 for 4 – 7.5 kW, 2 pole					•	•			96 10 22 00
			DN 80 for 4 kW, 4 pole							•		96 10 22 00
			DN 80 for 9.2 – 11 kW, 2 pole							•		96 10 23 86
			DN 100 for 1.5 – 2.2 kW, 4 pole		•	•						96 10 22 01
			DN 100 for 3 – 5.5 kW, 4 pole		•	•					•	96 10 19 17
			DN 100 for 7.5 kW, 4 pole		•	•					•	96 10 22 02
			DN 150 for 4 – 5.5 kW, 4 pole			•	•					96 10 22 63
5		Lifting chain with shackle, with certificates. Galvanized steel.	DN 150 for 7.5 kW, 4 pole			•	•					96 10 22 50
			3 m	•	•	•	•	•	•	•	•	96 49 74 66
			6 m	•	•	•	•	•	•	•	•	96 49 74 65
			10 m	•	•	•	•	•	•	•	•	96 49 74 64

Accessories

No.	Picture	Description	Dimensions	SEV.100.100	Product number													
6		Ball-type non-return valve with flanges. Cast iron, epoxy coated.	DN 65	•					•								96 00 20 08	
			DN 80		•	•				•	•						96 00 20 09	
			DN 100				•	•					•				96 00 20 85	
			DN 150						•								96 00 34 23	
			DN 200														96 00 38 39	
7		Non-return flap valve, cast iron with flange, with free shaft end for external lever and weight. Cast iron, epoxy coated.	DN 65	•					•								96 11 65 10	
			DN 80		•	•				•	•						96 11 65 11	
			DN 100			•	•					•					96 11 65 12	
			DN 150						•								96 11 65 14	
			DN 200														96 11 65 15	
8		External lever and weight kit. Steel, epoxy coated.	DN 65 and DN 80	•	•	•			•	•	•						96 11 65 33	
			DN 100				•	•				•					96 11 65 34	
			DN 150						•								96 11 65 35	
			DN 200														96 11 65 36	
9		Isolating valve with flanges. Cast iron, epoxy coated.	DN 65	•	•				•								96 00 20 10	
			DN 80		•	•				•	•	•					96 00 20 11	
			DN 100			•	•	•					•				96 00 20 12	
			DN 150					•	•								96 00 34 27	
			DN 200														96 00 38 40	
10		Bolts, nuts and gasket. Galvanized steel.	4 of each M16 x 65 mm, DN 65	•	•				•								96 00 19 98	
			8 of each M16 x 65 mm, DN 80		•	•				•	•	•					96 00 19 99	
			8 of each M16 x 65 mm, DN 100			•	•	•					•				96 00 38 23	
			8 of each M20 x 75 mm, DN 150					•	•								96 00 36 05	
			8 of each M20 x 80 mm, DN 200														96 00 38 37	
11		Gasket.	DN 65	•	•				•								96 00 20 00	
			DN 80		•	•				•	•	•					96 00 20 01	
			DN 100			•	•	•					•				96 00 33 31	
			DN 150					•	•								96 00 36 06	
			DN 200														96 00 38 38	
12		90° elbow, galvanized.	R/Rp 2½	•	•				•								96 00 19 81	
			R/Rp 3		•	•				•	•	•					96 00 65 63	
			R/Rp 4			•	•	•					•				96 00 65 64	
13		90° elbow, galvanized.	Rp/Rp 2½	•	•				•								96 00 19 91	
			Rp/Rp 3		•	•				•	•	•					96 00 19 92	
			Rp/Rp 4			•	•	•					•				96 00 65 65	
14		Hexagon nipple, galvanized.	R/R 2½	•	•				•								96 00 19 94	
			R/R 3		•	•				•	•	•					96 00 19 95	
			R/R 4			•	•	•					•				96 00 65 66	
15		Threaded flange, galvanized.	Rp 2½	•	•				•								96 00 19 96	
			Rp 3		•	•				•	•	•					96 00 19 97	
			Rp 4			•	•	•					•				96 00 33 36

Type key for LC and LCD controllers

		Example:	LC	107	230	1	12	30/150	DOL
Controller type	LC =	One-pump controller							
	LCD =	Two-pump controller							
Type of level sensors	107 =	Control of 1 or 2 pumps based on signals from bell shaped level pickups (pneumatic) Max. 11 kW shaft power DOL							
	108 =	Control of 1 or 2 pumps based on signals from float switches or electrodes Max. 11 kW shaft power DOL							
	110 =	Control of 1 or 2 pumps based on signals from electrodes Max. 11 kW shaft power DOL							
Voltage [V]									
Number of phases	1 =	1 phase							
	3 =	3 phase							
Maximum operating current per pump [A]									
Operating / starting capacitor [μ F]									
[] = without capacitor									
30 = operating capacitor									
30/150 = 30 μ F operating and 150 μ F starting capacitor									
Starting method	DOL =	Direct on-line starting							
	SD =	star-delta starting (only LC 108 and LCD 108)							

Note: Controllers with capacitor are for 12 A operating current.

Accessories

			12.0 - 23.0 A	•	•	•	•	•	•	•	•	96 00 24 77
23		LC 108 controller for float switches for 1 pump. 3 x 230 V, direct on-line starting.	1 - 2.9 A									*96 43 39 75
			1.6 - 5.0 A							•		*96 43 39 79
			3.7 - 12.0 A	•	•	•	•		•	•	•	*96 43 39 83
			12.0 - 23.0 A	•	•	•	•	•	•	•	•	*96 43 39 87
		LC 108 controller for float switches for 1 pump. 3 x 400 V, direct on-line starting.	1 - 2.9 A							•		*96 43 39 91
			1.6 - 5.0 A	•	•	•	•		•	•	•	*96 43 39 95
			3.7 - 12.0 A	•	•	•	•	•	•	•	•	*96 43 39 99
			12.0 - 23.0 A	•	•	•	•	•	•	•	•	*96 43 40 03
		LC 108 controller for float switches for 1 pump. 3 x 400 V, star-delta starting.	6.4 - 20.0 A	•	•	•	•	•	•	•	•	*96 43 79 28
			20.8 - 30.0 A							•		*96 43 79 50
			20.8 - 59.0 A									*96 43 79 70
			1 - 2.9 A									*96 43 40 23
24		LCD 108 controller for float switches for 2 pumps. 3 x 230 V, direct on-line starting.	1.6 - 5.0 A							•		*96 43 40 27
			3.7 - 12.0 A	•	•	•	•		•	•	•	*96 43 40 31
			12.0 - 23.0 A	•	•	•	•	•	•	•	•	*96 43 40 35
		LCD 108 controller for float switches for 2 pumps. 3 x 400 V, direct on-line starting.	1 - 2.9 A							•		*96 43 40 39
			1.6 - 5.0 A	•	•	•	•		•	•	•	*96 43 40 43
			3.7 - 12.0 A	•	•	•	•	•	•	•	•	*96 43 40 47
			12.0 - 23.0 A	•	•	•	•	•	•	•	•	*96 43 40 51
		LC 108 controller for float switches for 2 pumps. 3 x 400 V, star-delta starting.	6.4 - 20.0 A	•	•	•	•	•	•	•	•	*96 43 80 32
			20.8 - 30.0 A							•		*96 43 80 52
			20.8 - 59.0 A									*96 43 80 72
			1 - 2.9 A							•		96 48 40 85
25		LC 110 controller for electrodes for 1 pump. 3 x 400 V, direct on-line starting.	1.6 - 5.0 A	•	•	•	•		•	•	•	96 48 40 86
			3.7 - 12.0 A	•	•	•	•	•	•	•	•	96 48 40 87
			12.0 - 23.0 A	•	•	•	•	•	•	•	•	96 48 40 88
			1 - 2.9 A							•		96 48 40 93
26		LCD 110 controller for electrodes for 2 pumps. 3 x 400 V, direct on-line starting.	1.6 - 5.0 A	•	•	•	•		•	•	•	96 48 40 94
			3.7 - 12.0 A	•	•	•	•	•	•	•	•	96 48 40 95
			12.0 - 23.0 A	•	•	•	•	•	•	•	•	96 48 40 96

27		Float switch with 10 m cable.	For LC 108 and LCD 108 controllers.	• • • • • • • • •	96 00 33 32
		Float switch with 20 m cable.		• • • • • • • • •	96 00 36 95
		Float switch for use in potentially explosive environments, with 10 m cable.	For LC 108 and LCD 108 controllers connected to LC-Ex4.	• • • • • • • • •	96 00 34 21
		Float switch for use in potentially explosive environments, with 20 m cable.		• • • • • • • • •	96 00 35 36
28		LC-Ex4 intrinsically safe barrier, for use in potentially explosive environments, for float switch applications. The LC-Ex4 can be mounted in ambient temperatures ranging from -25°C to +50°C. Safety class: II (1) G [EEx ia] II °C.		• • • • • • • • •	96 44 03 00
29		Bracket for 2 float switches.		• • • • • • • • •	96 00 33 38
30		Float switches with bracket.	1 pump without alarm (2 float switches)	• • • • • • • • •	62 50 00 13
			1 pump with alarm (3 float switches)	• • • • • • • • •	62 50 00 14
			2 pumps without alarm (3 float switches)	• • • • • • • • •	62 50 00 14
			2 pumps with alarm (4 float switches)	• • • • • • • • •	62 50 00 15
31		Float switches for use in potentially explosive environments, with bracket.	1 pump without alarm (2 float switches)	• • • • • • • • •	62 50 00 16
			1 pump with alarm (3 float switches)	• • • • • • • • •	62 50 00 17
			2 pumps without alarm (3 float switches)	• • • • • • • • •	62 50 00 17
			2 pumps with alarm (4 float switches)	• • • • • • • • •	62 50 00 18
32		Electrodes for LC 110 and LCD 110.	1 electrode with 10 m cable	• • • • • • • • •	96 07 62 89
			3 electrodes with 10 m cable	• • • • • • • • •	96 07 61 89
			4 electrodes with 10 m cable	• • • • • • • • •	91 71 34 37
33		Bracket for electrodes.	For mounting on a 38 mm pipe	• • • • • • • • •	91 71 31 96
34		Back-up battery.	9.6 V	• • • • • • • • •	62 50 00 19
35		Signal lamp, outdoor mounting.	1x230 V	• • • • • • • • •	62 50 00 20
36		Acoustic signal (horn), indoor mounting.	1x230 V	• • • • • • • • •	62 50 00 22
		Acoustic signal (horn), outdoor mounting.	1x230 V	• • • • • • • • •	62 50 00 21

The Grundfos wastewater range

Heavy-duty submersible sewage pumps 5 – 29 kW

Brochure covers the Grundfos range of submersible channel-impeller pumps from 5 kW up to 21 kW and Super-Vortex pumps up to 29 kW. All designed for handling unscreened raw sewage. Available in 50 Hz and 60 Hz versions.

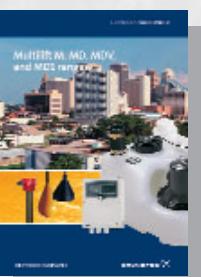

Super-heavy-duty submersible sewage and raw water pumps

Brochure covers the Grundfos range of super-heavy-duty channel pumps, axial flow pumps, and propeller pumps from 7.5 kW up to 520 kW.

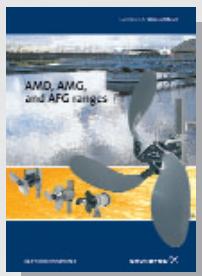

The KP/AP stainless steel range

Brochure covers a wide range of high quality stainless steel pumps for a variety of domestic and commercial applications.

Lifting stations

Brochure covers Grundfos lifting stations for individual as well as multi-user applications.

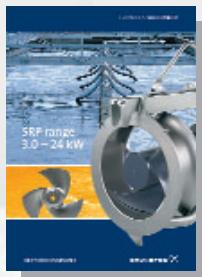

Mixers and flowmakers

Brochure covers the new range of mixers and flowmakers for optimal control of liquids and solids throughout the wastewater treatment process.

Heavy-duty submersible wastewater pumps 0.6 – 2.6 kW

Brochure covers the Grundfos range of submersible channel-impeller and Super-Vortex-impeller pumps from 0.6 to 2.6 kW. Designed for handling drainage, effluent and sewage from private dwellings.

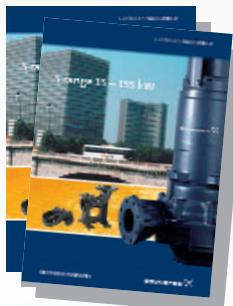

Submersible recirculation pumps

Brochure covers the Grundfos range of SRP submersible recirculation pumps for wastewater treatment plants and flood control.

Heavy-duty submersible sewage pumps 15 – 155 kW

Brochure covers the Grundfos range of sewage pumps from 15 kW up to 155 kW for handling of raw sewage in heavy-duty applications. Available in 50 Hz and 60 Hz versions.

Portable dewatering pumps

Brochure covers the Grundfos range of portable dewatering pumps (DW) from 0.8 kW to 20 kW for pumping raw water with abrasives.

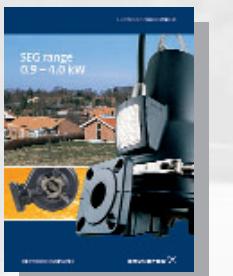

Stainless steel heavy-duty submersible pumps

Brochure covers the Grundfos range of heavy-duty stainless steel pumps (SEN) for aggressive and corrosive environments.

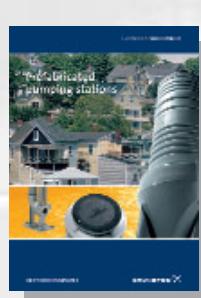

LC/LCD level controls

Brochure covers the Grundfos range of controls for the wastewater pumping systems.

Submersible sewage grinder pumps

Brochure covers the Grundfos range of sewage grinder pumps (SEG) for pumping of wastewater with toilet discharge.

Prefabricated pumping stations

Brochure covers the Grundfos range of prefabricated pumping stations for collecting and removing drainwater, surface water, domestic and industrial wastewater and sewage.

Business with an attitude

Knowledge The sharing of knowledge, experience and expertise across our global network will always lead our business forward.

Innovation Combining the best technology with fresh ways of thinking, we will continue to develop even better pumps, systems, services and standards.

Solution With a complete product range, capable of providing every conceivable water solution, we are the most complete player on the market.
