CM Series Motor Pumps

ISO2858 Heavy Duty Industrial Centrifugal Pumps

DEPEND ON

DAVEY

PUMPS

TECHNICAL SPECIFICATIONS

The Davey ISOspec® range has been designed to international standard **ISO2858** ensuring a sturdy & reliable, long lasting, high performing product that consumers have come to depend on from Davey.

Suitable Applications

Water Supply

Commercial irrigation, booster stations, municipal water supply, flood irrigation, general transfer.

Industry

Cooling tower transfer, refrigeration systems, commercial fountains, condensate recovery, dairy wash down packages.

Environmental

Dust suppression in mining & quarry applications, fume scrubbers for odour control, water treatment transfer & filtration.

Leisure

Water circulation in large aquatic centres, backwash filtration in commercial pools, water features & commercial fountains.

Building Services

Commercial heating, air conditioning systems, pressure boosting, cooling tower & fire service applications.

Pumped Liquids

Non aggressive & non combustible liquids. Clean low viscous liquids free of fibres or particles.

Operating Conditions

CF Series Bareshaft Pumps

Maximum flow	900m ³ /hr
Maximum total heads	160m
Liquid temperature*	-15 to 140°C
Operating pressure	16 Bar

* With optional high temperature seal.

CM Series Motor Pumps

Maximum flow	410m ³ /hr
Maximum total heads	160m
Liquid temperature*	-15 to 140°C
Operating pressure	16 Bar

* With optional high temperature seal.

Model Designation (Examples)

ISO CF 250x200-400

ISO CM 125x100-200

The Davey ISOspec® Series is comprised of 29 standard sizes. Pumps with different impeller diameters and speeds are available to satisfy various performance ranges. Performance curves within this catalogue are in compliance with ISO2858 standards.

TECHNICAL SPECIFICATIONS

Design Features

Davey ISOspec® design is in accordance with international standards of **ISO2858**, which means ISOspec® Series pumps are interchangeable with other similar pumps, conforming to the same standards. This ensures a robust, long lasting, high performing product consumers have come to depend on from Davey.

Bronze wear rings - fitted as standard, replaceable front & rear wear rings with optional materials, for a trouble-free lifecycle.

Bronze impeller - in a closed design is fitted as standard to prevent corrosion in stationary or inactive situations. Cast 304SS or 316SS are available on request. The use of 3-D solid model (CAD) Computer Aided Design and (CFD) Computational Fluid Dynamics ensures **high efficiencies**, reducing overall running costs. Impeller diameters can be trimmed to suit specified performance. ISOspec® impellers are dynamically balanced, providing smooth, vibration free operation, preventing premature bearing failure.

Pump casing - highly efficient cast iron volute casings, with flanges rated to PN1.6MPa (16bar), drilled to AS2129, Table E. Material options: 304SS or 316SS.

Casing o-ring - re-usable o-rings in Nitrile for ease of re-assembly (optional materials available).

Shaft seal - single, high quality John Crane or approved equivalent mechanical seal with **carbon vs ceramic** fitted as standard to all ISOspec® Series pumps with other options such as Silicone vs Silicone or high temp also available.

Tappings - convenient suction & discharge pressure gauge tappings plus volute drain, fitted as standard to all ISOspec® Series pumps.

Back pull-out design - allowing for easy removal of rotating element without disturbing the pipework, lagging or pump volute casing. This is proven to reduce downtime whilst performing routine maintenance.

CM Series adaptor housing - heavy duty, flanged to IEC accepting AS 1359 standard designed motors.

Enlarged shaft - reduces shaft deflection. Standard in 420SS & 316SS as an option. Tapered & keyed shaft design allowing ease of removal in maintenance & positive locking whilst in operation (CF Series only).

Stub shaft - standard in 316SS, attached via a heavy duty muff coupling assembly. Tapered & keyed shaft design allowing ease of removal in maintenance & positive locking whilst in operation (CM Series only).

Bearings - Heavy duty SKF or approved equivalent, greased for life, reducing maintenance. Protected by a quality manufactured lip seal reducing ingress of moisture or foreign matter. Housed within removable bearing cap cover assembly (CF Series only).

CF Series bearing housing - Robust / heavy duty, manufactured in high strength cast iron providing trouble-free life cycle.

CM Series Motors - All motors are MEPS compliant ensuring minimum efficiency requirements to AS/NZS 1359.5.2000. IP55, TEFC (totally enclosed fan cooled), insulation class F, temperature rise class B, 415V, 50Hz. Other voltages available upon request.

- Notes:
1. Standard flange drilling to AS2129 Table E: 16 bar rating.
 2. Dimensions in mm.
 3. All motors listed are 415V. Other voltages are available upon request.
 4. All motors up to 7.5kW have top mounted terminal box.

N/A = Not Applicable
